

Timeless and elegant interiors *unexpected and inspirational*

Cinzia Moretti and Michele Ingrassi are a husband-and-wife team with a winning combination of interior design expertise and lighting skills.

Whether they're designing a country chalet, a period property or a new-build house, there is always something very distinctive about their work. Italian-born designers with impeccable taste and a fondness for neutral tones, simplicity and elegance, they never compromise in terms of attention to detail. Coming from a theatre background, Cinzia started her design career in 2006 and holds a Diploma in Interior Design and a BA (Hons) in Design and Innovation. She started while still at college, where her talent was spotted at a world-famous design fair: the Ideal Home Show. She has been designing ever since, and has demonstrated her flair for innovative design across multiple projects that have allowed her to broaden and refine her skillset.

In 2014, Cinzia launched Moretti Interior Design Ltd together with her husband. Playing a vital role in the studio, Michele, a lighting designer, has infused all of the company's projects with a magical twist. Michele holds a BSc in Engineering and a Master's in Technology and Communication. He has always been passionate about how technology is used in homes, and has worked for many years in project management for big companies.

At Moretti Interior Design, the philosophy is to design harmonious homes that function smoothly, as well as to produce contemporary, classic designs with traditional notes. Through this strategy, Cinzia and Michele create timeless and elegant interiors that offer something unexpected and inspirational.

Recently, Cinzia has been following her passion for eco-design, having created a line called Bio-Design. This has allowed her to express her creativity by establishing new and stylish product designs that are inspired by nature.

Moretti Interior Design Ltd is a full Design Practice Member of the British Institute of Interior Design (BIID). As a Design Practice Member, the company continues to pursue professional development to ensure their continued expertise in the design process, as well as in practice and regulatory matters. In addition, Moretti Interior Design is proud to be included in the 2016 House & Garden List for UK designers.

Cinzia and Michele have recently completed several houses in the Fulham area, and are currently working on a range of projects, which include the renovation element of a large-scale residential project in Chiswick, a house extension in south-west London, the design of bespoke furniture for a project in north London, and a full house renovation outside London. ■
